

Special Rate Questionnaire

For: Foster Child Name _____ Participant ID: _____

Note: a foster child will be assessed as a **regular rate** when their care requires a resource parent to participate in general parenting tasks which include:

1. Transportation for normal school/social/religious functions, routine medical appointments; i.e., shots, annual physical, and dental.
2. Examinations/evaluations—may require routine/initial consultation with a specialist.
3. Behavioral-typical associated with the child's age.
4. Provide the child with age-appropriate outside recreational activities on a regular basis.
5. Have good knowledge of appropriate parenting, regarding consistency, consequences.
6. Facilitate a minimum monthly contact with siblings in care who do not reside with them in accordance with the case plan.

.....
Section 1 (Special II rate):

In addition to **all** of the above responsibilities, do you perform **at least one** of the responsibilities listed below:

	NO	YES	If YES, provide additional detail
Provide transportation to and from visitation with parent/guardian or permanent placement.			
Provide transportation for a child who has specialized appointments two times per month in 2 or more categories. Specialized appointments which include, but are not limited to:			
mental health treatment recommended by the RBHA and/or by an IEP at least two times or more per month.			
unusual and prolonged (six months or longer) appointments for physical and/or occupational and/or medical and/or dental appointments/therapy.			
frequent contact with schools/child care, due to child's repeated and documented history, creating a need for frequent contact.			

.....
Section 2 (Special III rate):

If you answered **YES to at least one of the questions above**, does the child named above also display **at least one** of the criteria below:

	NO	YES	If YES, provide additional detail
A repeated and documented history of sexually reactive behavior; i.e., public masturbation, use of sexually explicit and/or suggestive language, sexual play, inappropriate behaviors between children, etc. This does not include normal childhood sexual exploration. Sexual reactive behavior also differs from perpetration.			
A continual and documented history of aggression requiring intensive supervision or multiple (2 or more) disruptions caused by the child's behaviors.			
A medical condition (acute or chronic) that does not meet the Medically Fragile criteria and the condition is expected to last six months or longer.			
Thirteen years of age or older, provided that transportation is furnished for day to day activities, visitation, or any other activities designated in the Special II rate.
